

Daniel Lakier, CTO, SeeGee Technologies, Inc.

Before joining the SeeGee team 8 years ago, Daniel had a decade of solid IT integrator experience for global brands like Cisco and Citrix. Though he has a diverse IT background spanning multiple disciplines including sales, engineering, and architecture, Daniel brings specialized expertise in security and Layer 4-7 application identification technology. Daniel has served on the advisory board for multiple top security vendors and currently provides security consulting to Fortune 100 enterprises. Rather than focusing merely on the latest product features, Daniel views IT strategically and holistically, unearthing ways that technology enhancements can be applied to wide spectrum of challenging business needs.
